NO. OF ENCLS. 1

OT CIRCULATE

SUPPLEMENT TO REPORT NO.

25X1X

location:

The VILNIUS (25-20E-54-40N) power plant is the northern bank of the Vilya River, 750 feet northeas; of the wooden bridge and northwest of the hill with the old castle on top.

Installations:

When the plant was destroyed in 1945 the administration building remained serviceable, and one turbine and one boiler were only damaged. They were repaired by March 1946 and half a year later the framework of the new buildings was completed. A new turbine and a new boiler were set up in November 1946. The steel constructions for the coal bins above the boilers were installed but the work was not completed in October 1947. The power plant has a spur track. For distribution of buildings see Annex.

- Work Force: 100 Soviets and 180 PWs.
- Capacity: Unknown.

25X1A

Comment:

The report clarifies the location of the switching station concerning which contradictory information had been received. The attached sketch shows that the switching station is located on the second floor of the eastern section of the turbine and boiler house.

b. The report confirmed the location and layout of the power plant. The size of the turbine and boiler house is larger than given previously.
